This workshop aims to take stock of recent research on fiscal and welfare policies, inequality, wellbeing, labor market dynamics, support for democracy, and other social outcomes in LAC. Contributions in various domains of economics, quantitative social sciences and political sciences are welcome, and in particular on (but not restricted to).

- Tax-benefit systems, redistribution and poverty
- Informal employment, labor markets dynamics and working conditions.
- Welfare programs and their impacts on education and health inequalities.
- Equality of Opportunity and Intergenerational Mobility
- Perceptions of richness, fairness, income inequality, and wellbeing.
- Political economy, social unrest and the middle class, as well as other determinants of societal change.

Contributions focusing on other world regions are also welcome as long as there is a clear application for the context of LAC.
